

HAVE YOU USED OUR STEEL LINTELS?

We stock a range of galvanized angle iron for use as steel lintels on home builds, and according to Bricklayer Phil, the service is pretty good.

The value we can bring to your company is:

- Immediate supply (no delays waiting for black steel to go to the Galvanizers)
- Your project keeps moving
- Onsite delivery
- Cost effective
- Complete customization available

We have at least 11 different options as far as dimension of angle and thickness required, and we can cut to length and deliver to Canterbury sites same day if necessary, or ship around the South Island.
