**CHEAPER****SAFER****EASIER**

LIME JUICE is a colourless liquid admixture, engineered as a lime alternative in lime-cement mortars. Lime Juice provides all the technical features of traditional lime compounds without the hazard of being highly caustic.

Developed by brickies, for brickies, it's the safer alternative that's cheaper and easier to use. With one five-litre bottle equal to 10 x 20-kilogram bags of lime, it's the cost-saver you need on your job site, significantly reducing the cost of mortar.

SILICA DUST FREE

COMPLIES WITH AUSTRALIAN MASONRY STRUCTURES STANDARDS

INCREASES THE ADHESION OF FRESH MIXTURE TO THE SUBSTRATE.

INCREASES MASONRY WALL STRENGTH.

A must have product for all brickies!
